Dear Carmen María Moles Moles,

Thank you very much for your submission to our recent [Call for Papers](#). **We are pleased to inform you that your abstract was evaluated very positively and is considered a high-quality contribution.**

Overall, the call was highly successful, attracting an exceptionally large number of high-quality abstracts. However, due to the volume and overall quality of submissions, it is not possible to accommodate all strong contributions to be published in the 2027 Working Paper issue. We are therefore planning an additional Working Paper issue in 2028, which will allow us to include a broader selection of papers.

We understand from your abstract that your research is still ongoing and that the findings presented are preliminary. Should this be the case, **we would be pleased to include your contribution in the 2028 Working Paper issue.** Scheduling the publication in 2028 would allow sufficient time for your work to be fully developed, while also supporting a balanced and high-quality publication process. Authors selected for the 2028 issue will also be invited to present their work at a Cedefop high-level European event planned for 2028.

We would therefore **kindly ask you to confirm whether our understanding is correct, namely that your research is still ongoing and not yet finalised**, and that you agree to have your work considered for publication in the 2028 Working Paper issue. Please let us know in reply to this email by **Tuesday, 28th April 2026**.

Thank you once again for your interest and valuable contribution.

Kind regards,

Michail Papazoglou on behalf of the organising team
